# About Us

## Magroll Insulated Sectional Doors

The Magroll brand of sectional doors brings you the very best in quality and reliability. All the panels and components used in the manufacturing of our doors are produced by Ryterna [www.ryterna.eu](http://www.ryterna.eu) one of the largest and most well respected brands in Europe.

All doors are made specific to your size and requirements, each door is produced from 40mm polyurethane foam filled panels with a steel outer and inner skin. The steel is factory hot dipped, galvanised, then a primer is applied followed by a final top coat in the colour of your choice. This provides a very long lasting corrosion resistant finish.

All doors are spring counter balanced by using various types of spring systems, depending on the requirements and site suitability.

The thermal insulation of this door is to the highest level, Example 3050mm wide x 2550mm high will have a thermal value of 1.6 W/ m<sup>2</sup>K) Magroll doors are all CE marked to EN13241-1 and have been tested by Europe's most respected test labs.

Automation can be supplied with your door and the choice of operator can be discussed with your installer.

By purchasing a Magroll door you are ensuring a top quality, durable and long lasting door.
